THE COLT CAR COMPANY

Revised 22.11.2005

DATE	04 th September 2003
NEWSLETTER	SNL-03-12-02
MODEL	All Models
GROUP	Lubrication (Group 12)
SUBJECT	4D56 Extended Service Intervals

This Newsletter is to inform you of the recent test results regarding extended service intervals on the 4D56 engine fitted to the L200 and Shogun Sport.

In December 2002 we announced on Newsletter SNL-02-12-02, that by using Castrol Formula SLX 0W-30, the service intervals could be extended from 4500 miles / 6 months to 9,000 miles / 12 month's.

Since this announcement Shell, Mobil, Morris and **Q8** agreed to complete their own evaluation tests to determine whether or not their oil would be suitable for our purposes.

These evaluations have now been completed and the following oils may be used when extending the service intervals on the 4D56 engine.

Castrol Formula SLX 0W-30

Shell Helix Ultra 5W-40

Mobil 1 0W-40 with Supersyn

Morris Multilife 5W-40

Q8 Formula Excel 5W-40

For details regarding extending service intervals please refer to Newsletter SNL-02-12-02.

At this time, Castrol, Shell, Mobil, Morris and **Q8** are the only oil companies that have approached us regarding approving their oils. These are the only oils to be used, if you use another brand of oil, please ask your oil representative to contact us with regards to carry out an evaluation on their recommended product.

If you have any questions regarding this Newsletter please contact the Technical Department here at CCC.
